

Workshop on Swedish Professor Chair Program at ITA October 3, 2017

INTRODUCTION:

The Swedish Endowed Professor Chairs at ITA in the Honor of Peter Wallenberg Sr. is an initiative of CISB and SAAB to bring top researchers to Brazil with the purpose of creating and strengthening long-term collaboration between Sweden and Brazil on relevant research topics. The program has just complete 3 years during which it brought 3 Swedish professors to the Aeronautics Institute of Technology (ITA).

In order to disseminate the excellent results of this program and promote similar initiatives, CISB and ITA are organizing the **Workshop on Swedish Professor Chair Program at ITA** on October 3, 2017. The workshop will discuss the role of the research chairs in creating an ecosystem for international collaboration, based on the status of the three on-going research projects, their connection with research groups from different universities in Brazil and their perspectives for the future. It will be closed by a roundtable discussion about the program long-term sustainability and related initiatives.

VENUE: ITA, São José dos Campos, SP

LCFT – Laboratório da Computação em Fenômenos de Transporte

TARGET AUDIENCE: professors, researchers, companies and funding agencies.

PROGRAM
